# POWERFUL WORLDWIDE AND SERVICE- ORIENTED

**Dear Sir or Madam,**

One of the strengths of IMS is the immediate, worldwide and manufacturer-independent provision of spare parts for, and the repair of, large MTU diesel & gas engines. In addition, we also have an extensive inventory of complete MTU engines. Our clients include navies, state institutions, shipyards, railway companies, electricity suppliers, ferry companies, yacht owners, repair companies and dealers. Allow yourself to be convinced by our service!

Andreas Breuckmann,  
Managing Director

IMS Industrial & Marine Services GmbH & Co. KG is an internationally active company in the area of industrial & marine services. IMS has won the trust of a large number of customers in Germany and all around the world, in a market in which extremely good flexibility, security and usability are the key to success.

We operate independently of the engine manufacturer all over the world in the areas of spare parts for fast running diesel & gas engines, repair and complete engines. Reliable, fast and flexible.

We have an outstanding international network of local partners, who are very familiar with the typical features of the respective country, for example in the respective procurement procedures, state tenders, and in cooperation with state authorities.

Meanwhile, customers from over seventy countries rely on our short response times, personal on site support, reliability, and favourable terms and conditions.

## SPARE PARTS

IMS specialises in the worldwide supply of spare parts, independent of the engine manufacturer, for highspeed large MTU diesel & gas engines used in shipping, railway technology, commercial vehicles, the oil & gas and the energy supply industry. In doing so, we guarantee consistently high quality in the delivery of genuine and OEM spare parts. The scope of our spare parts warehouse is unique and ensures the longterm problemfree, fast supply of spare parts. In addition, we also offer carefully remanufactured spare parts, so called reman-parts.

## REPAIR

We repair large MTU engines and the associated engine components reliably and competently, up to maintenance level W6 and/or QL4. Naturally, we have all the necessary special tools and technical documentation available to carry out the repairs professionally. We thus offer our customers maximum flexibility through our full service: removal, transport, repair, test runs, plus installation and commissioning of the engine – worldwide.

## COMPLETE ENGINES

We have an extensive warehouse stock of used MTU engines, which we deliver either as complete engines or as individual parts. At the customer's request we also offer the engines, or individual parts, as fully repaired – these of course come with a one-year guarantee.

You can find an up-to-date list of all complete engines currently in stock on our website at [www.ims-germany.com](http://www.ims-germany.com). Or simply scan the QR Code below.
